

# Mill Stream Restoration

Open House: Tuesday, Jan. 21 (6-8pm)

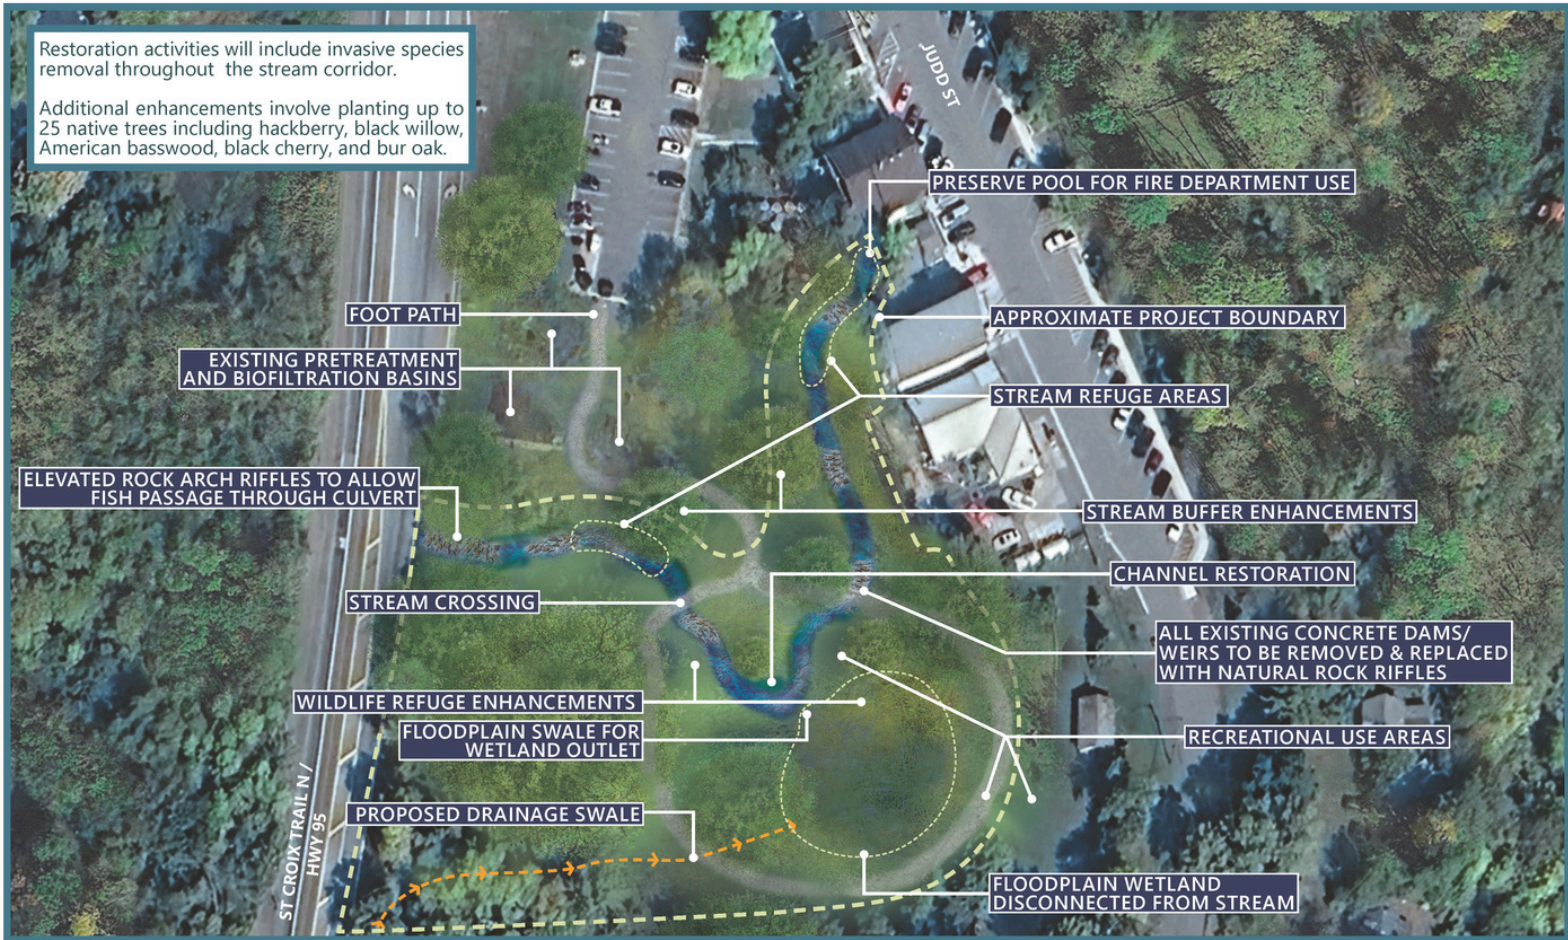

Marine Village Hall

Last year, Marine residents shared their visions for a restored Mill Stream in the heart of the community. We listened and went to the design board!

Join us for a community meeting to review the draft designs for this project.

## MILL STREAM RESTORATION - REACH 2

MARINE ON ST. CROIX, MN

The Carnelian-Marine-St. Croix Watershed District is planning to restore this portion of Mill Stream to improve water quality and habitat for brook trout. Establishing native vegetation throughout the corridor improves the quality of water entering Mill Stream the addition of rock riffles slows water to improve fish passage and habitat.
